United Envirotech Ltd Won Bid for a RMB 90 Million Project to Upgrade a 100,000 m3/day Industrial Wastewater Treatment Plant In Jiangsu Province, China

The Board of Directors of United Envirotech Ltd. (“UEL” or “Company”) is pleased to announce that on 28 August 2013, the Company is awarded a RMB 90 million (SGD 19 million) Engineering Procurement and Construction (EPC) project to upgrade a 100,000 m3/day industrial wastewater treatment plant in Nantong City, Jiangsu Province, China.

The wastewater treatment plant serves industries located in the Nantong Economic Development Zone and about 70% of the wastewater is from textile industry. Upgrading of the plant is required to meet the more stringent Grade 1A discharge standard imposed by the local government.

Dr Lin Yucheng, Chairman and Chief Executive Officer of UEL said, “We have seen the strong commitment by the Chinese government in implementing the more stringent discharge standard especially along the coastal industrial region. The upgrading project reaffirms our position as a leading industrial wastewater treatment solution provider. Our experience in treating textile wastewater and execution track record in upgrading project has contributed to the project win. We believe UEL will continue to benefit from the increase in demand for upgrading of wastewater treatment plants.”

The project will commence immediately and is expected to be completed by the end of December, 2013.

None of the Directors and controlling Shareholders has any interest, direct and indirect (other than through their shareholdings in the Company) in the project.

For and on behalf of the Board

Dr Lin Yucheng
